HEALTH ASSESSMENT QUESTIONAIRE - CHILDREN

This is a confidential health assessment questionnaire which is designed to provide insight into your child's health and behaviour and lifestyle. The following questions will assist in providing the best possible care for your child and in understanding the factors that may be playing a role in your child's health.

The following questionnaire is <u>not</u> designed to give a medical diagnosis. It will identify current strengths of your child's health, any risk factors that might be present, and it will be used by the Naturopathic Doctor to highlight recommendations that you may want to consider.

This questionnaire will take about 45 minutes to complete. The length of time that you take to answer the questions is completely up to you and has no bearing on the results.

General Guidelines to follow when filling out the Questionnaire:

- Select the answer that is best suited to each question
- Read all questions carefully prior to answering
- Write in any response that is not provided on the questionnaire (e.g. if you do other exercises)

The Naturopathic Assessment for children is divided into nine categories:

A. General Information В. Parent's Health during Pregnancy C. Family History and Information D. First Few Years of your Child's Life E. Past and Present Health Concerns F. General Information on Diet A Typical Day for your Child G. Н. Understanding your Child's Patterns of Behaviour I. Review of Physical Systems Please circle the response that is correct or fill in the blanks. A. GENERAL INFORMATION
